

# 1971 CJ-5 Renegade Wiring Diagram by T.R. Yelton (mnemonic76)

- |                                  |                              |                              |                          |
|----------------------------------|------------------------------|------------------------------|--------------------------|
| 1 Left Headlight                 | 12 Instrument cluster        | 21 Back-up light switch      | 31 Ballast resistor      |
| 2 Left parking and signal light  | 13 Ignition and start switch | 22 Marker light              | 32 Ignition coil         |
| 3 Right parking and signal light | 14 Horn button               | 23 Right tail and stop light | 33 Spark plugs and wires |
| 4 Right headlight                | 15 Directional signal switch | 24 Right back-up light       | 34 Coolant temp. sender  |
| 5 Marker light                   | 16 4-way flasher switch      | 25 Left back-up light        | 35 Oil press. sender     |
| 6 Alternator                     | 17 Flasher (4-way)           | 26 Left tail and stop light  | 36 Horn                  |
| 7 Voltage regulator              | 18 Windshield wiper switch   | 27 Marker light              | 37 Junction block        |
| 8 Starter motor                  | 19 Main light switch         | 28 Stop light signal switch  | 38 Marker light          |
| 9 Battery ground cable           | 20 Fuel gauge sending unit   | 29 Foot dimmer switch        | 39 Oil Pressure Gauge    |
| 10 Battery                       |                              | 30 Wiper motor assy.         | 40 Ammeter               |
| 11 Flasher (directional signal)  |                              |                              | 41 Courtesy Lights       |
